Strong correlations:
1. $loan_amnt with $funded_amnt, $funded_amnt_inv and $installment
2. $out_prncp with $out_prncp_cv
3. $total_pymnt with total_pymnt_inv, $total_rec_prncp and $total_rec_int

Groups 1 and 3 are correlated with each other too.

$pmnt_months and pmnt_diff were left out of the correlations chart because they contain NA's so corr test failed.

Get rid of:
$policy_code (all 1's)
